

## **Statistics 467/567 Applied Multivariate Analysis – Statistical Software Access per**

### **Rutgers OIT Microcomputer Support Group - Summer 2020**

- As of July 1, 2020, until RU computer labs re-open (those computer lab physically located and maintained in ALL RU Libraries and RU Student Centers), statistical software (SPSS, SAS) is available on the RU OIT software portal and can be run virtually from any computer.

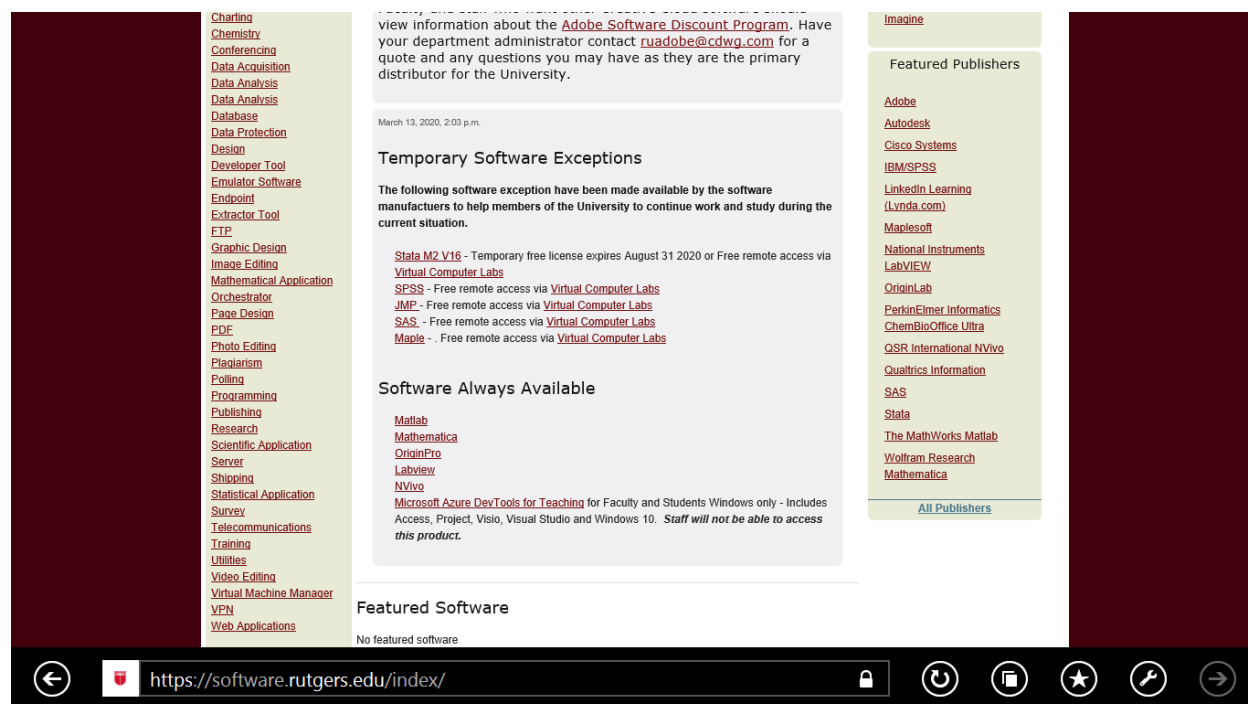

Go to:

1. <https://software.rutgers.edu/info/login/>

>>>>>Net ID and Password required

Once in the software.rutgers.edu portal click on hyperlink adjacent to the name of the software entitled, "virtual computer labs." See the screen shot no. 1 illustration below.

2. Next, click on "Accessing Virtual Computer Labs," -- see screen shot no. 2.
3. And finally, referring to screen shot no. 3 click on <https://labgateway.rutgers.edu> . The virtual lab screen for access to SPSS and SAS software for example is available either in a separate tab or window.

They give you the software you need, from any location, at any time.

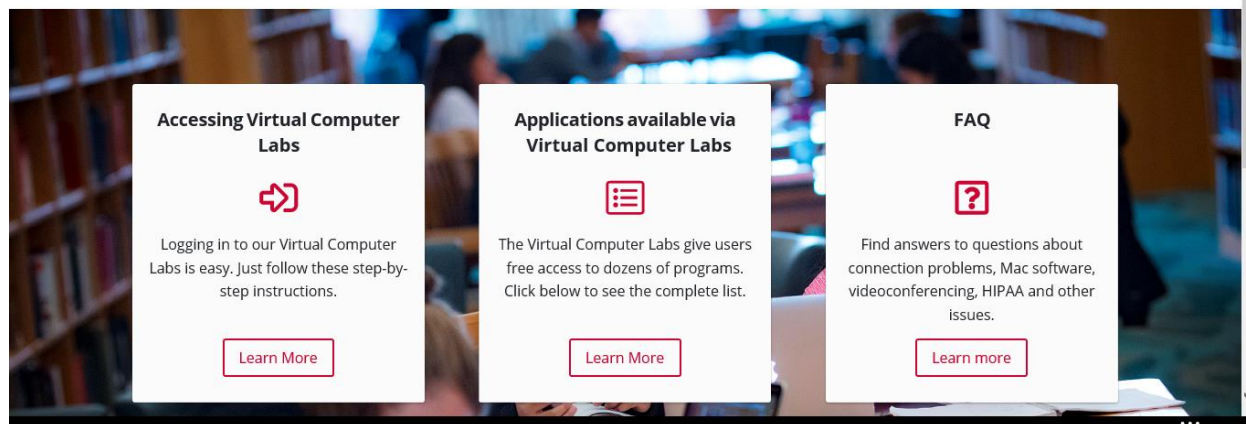

You get free access to dozens of useful software applications.

They're always open: 24 hours a day, 365 days a year.

The software comes to you. You can work or study from wherever you happen to be.

RUTGERS IT / VIRTUAL COMPUTER LABS / KNOWLEDGE BASE / GENERAL INFORMATION / **ACCESSING VIRTUAL COMPUTER LABS**

## Accessing Virtual Computer Labs

Students, faculty, staff and users with a guest role can now utilize OIT computer lab PCs – and all Windows applications provided in the general use labs – from any location at any time.

Available applications include Microsoft Office, Adobe Creative Cloud and dozens more. Here is a [complete list](#).

Note: Virtual Computer Labs are not compliant with the privacy regulations of the Health Insurance Portability and Accountability Act (HIPAA) and should not be used to conduct business related to Protected Health Information.

### Logging In

Navigate to <https://labgateway.rutgers.edu>. You may be prompted to allow access to your clipboard. If you wish to copy and paste between your local computer and the lab computer, you can choose **Allow**.

Log in with your **NetID** and **NetID password**.

**APACHE GUACAMOLE**
